SUMMARY

Diploma in Computer Engineering student (third year) at Government Polytechnic Pune, seeking a 6-month Software Development Internship. Hands-on experience building Android apps in Java, desktop apps in Python, multiplayer games and cloud projects. Strong foundation in Java, HTML, RDBMS, cloud computing and cyber security.

EDUCATION

Diploma in Computer Engineering — Government Polytechnic Pune Pursuing
Third Year, Semester 5 | Semester score: 80.33%

Secondary School Certificate (SSC)
Score: 88%

TECHNICAL SKILLS

Programming Languages	Java, Python (learning)
Web Technologies	HTML, CSS, JavaScript
Mobile Development	Android Studio, XML layouts, SharedPreferences
Databases	RDBMS, SQL, SQLite, MySQL
Cloud and Security	Cloud Computing, Serverless Architecture, Cyber Security fundamentals
Tools	Git, GitHub, IntelliJ IDEA

PROJECTS

1. NeuroDrive — Driver Drowsiness Detection App | *Java, Android Studio, Google ML Kit, IMU Sensors*

- Built an Android driver-safety app that detects drowsiness through facial monitoring and alerts the driver.
- Implemented eye-blink duration, PERCLOS, gaze-direction and yawning detection, combined with motion-sensor data.
- Added a driver safety score and trip history.

2. Music Player | *Python*

- Built a desktop application for music playback in Python.

3. Bomberman — Multiplayer Game | *Java, Java Swing, WebSockets, MySQL*

- Built an online multiplayer version of the classic Bomberman game with bomb placing, breakable blocks and pixel-art graphics.
- Implemented real-time player synchronization over WebSockets and customizable game rooms.

4. CareerNest — Career Guidance Android App | *Java, Android Studio, XML, SharedPreferences*

- Built an Android app that helps students explore careers, with skills, learning roadmaps and quizzes for each career.
- Added registration and login, saved careers, quiz results and dark mode.

5. Serverless Image Processing | *Cloud Computing, Serverless, Event-Driven Architecture*

- Built a cloud project that processes images automatically through a serverless, event-driven workflow.

6. Video Compression using HEVC | *HEVC (H.265)*

- Built a project that compresses video using the HEVC (H.265) standard.

7. Personal Portfolio Website | *React, TypeScript, Vite, Tailwind CSS*

- Built and deployed a portfolio site with automatic deployment to GitHub Pages using GitHub Actions.

CERTIFICATIONS

- Artificial Intelligence Certificate — IBM
- AI Passport Certificate — Microsoft and EY
