PROFILE

Computer Engineering diploma student with completed projects in Android development, Python, Java and IoT-based driver safety. Interested in practical software development and learning in a professional development team.

INTERNSHIP AVAILABILITY

Available full-time for a six-month internship starting November–December 2026, subject to college approval.

PROJECTS

CareerNest — Your Career Starts Here
Career-guidance Android app with career details, roadmaps, quizzes, saved careers and dark mode; built with Java and SharedPreferences.

NeuroDrive — Drowsiness Detection & Fleet Telematics
IoT driver-safety project using camera-based fatigue indicators (eye blinks, gaze and yawning), sensor-monitoring concepts and alerts.

Cloud-Based Serverless Image Processing
Cloud project exploring image processing through a serverless, event-driven workflow.

Python Music Player
Python desktop application for music playback.

Bomberman — Java Game
Java game project inspired by classic Bomberman gameplay.

CAREER FOCUS

Software Development · Full Stack · Android Development
